

Installation & Usage Guide (.CUBE Files)

Thank you for purchasing!

These LUTs are delivered as **.CUBE files** and can be used in most photo & video editing apps that support LUT imports.

What Is a LUT?

A **LUT (Look Up Table)** is a colour preset that instantly changes the mood, tones, and colours of your photo or video. Think of it as a professional colour grade in one click.

How to Use Travel LUTs in VN App (Mobile)

Step 1: Import Your Clip

1. Open the **VN app**
 2. Create a **New Project**
 3. Import your video clip(s)
-

Step 2: Add a LUT

1. Tap on your clip in the timeline
 2. Select **Filter**
 3. Tap **LUT**
 4. Choose **Import LUT**
 5. Select one of the **.cube** files from your device
-

Step 3: Adjust Intensity

- Use the **Intensity / Strength** slider
- Recommended starting point: **50–70%**
- Adjust exposure, contrast, or saturation if needed

✨ *Tip:* Every clip is different — small tweaks make a big difference.

Best Results Tips

- ✓ Shoot in **natural light** whenever possible
 - ✓ Slightly underexposed footage works best
 - ✓ Reduce LUT intensity for skin tones
 - ✓ Pair with minor contrast & highlight adjustments
-

Compatible Apps

These LUTs work with most editors that support **.cube** files, including:

- VN
- LumaFusion
- CapCut (Pro / Desktop)
- Final Cut Pro
- Premiere Pro
- DaVinci Resolve

(Import process may vary slightly between apps.)

Usage License

- ✓ For **personal & commercial use**
- ✗ Do **not** resell, redistribute, or share the LUT files
